

Aeries Communications Preferences

In Aeries Communication there are three global communication preferences that control what type of messages you will receive. Please review the three options and how Jefferson School District uses each to determine which preference is right for you.

Do Not Contact: The user will receive no communication for Jefferson School District even during emergencies.

General and Emergency Announcements: The user will receive all communication from Jefferson School District and may control the type of communication by going into notification preferences (school newsletters, information post-emergencies, classroom events, school-wide events).

Emergency Announcements: The user will receive messages only relating to school emergencies (school closures, lockdowns in progress, etc.)

Aeries Communications Notifications Preferences

Users may further refine their communication preferences by selecting which groups to belong to and whether they want phone, email or text communication for each group. Please review the videos and guides below to adjust your settings.
